## IDOLA SPECUS

*Idola Specus*, recorded in spring 2014 and released by Sepulchral Voice Recods on July 25th, marks the first full-length album release by a band that was originally founded 1992 in Berlin and has since gone through a good number of demos, line-up changes, split-ups and long comatose intervals. Containing material written over a period of roughly six years and introducing new members T2 and G, it takes up the torch from where Drowned left off with their mini-album *Viscera Terrae* in 2006.

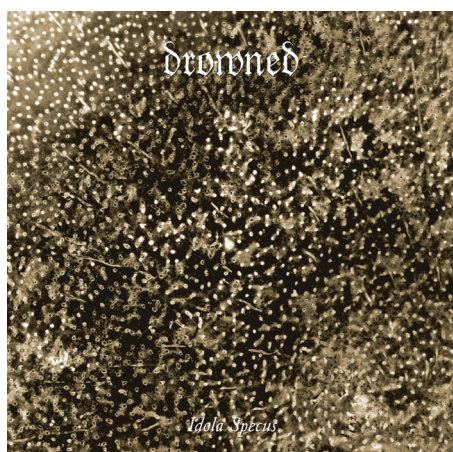

The purpose of *Idola Specus* is not to present a rehash of times begone, but to add a valid statement to the gospel of Death Metal as it was meant to be played. Emanating an aura of surreal morbidity with hints of doom and prog, *Idola Specus* is as esoteric and introspective as it is dark, heavy, and raw.

## LIVE

In their current incarnation, Drowned have played both *Kill-Town Death Fest* in Copenhagen and Norway's prestigious *Beyond the Gates* festival in 2013. The first live appearance scheduled for 2014 is a gig on *Hell's Pleasure Metalfest*. More shows to be confirmed soon.
