Where Voices Leave No Echo

HORNS OF DOMINATION return at last!

6 years after their rehearsal demo, which resulted in a string of reputable shows and festivals, HORNS OF DOMINATION will finally release their debut album 'Where Voices Leave No Echo' on October 22nd 2021.

Featuring 8 songs which raise the band's musicality to a new level.

The filth and bestiality displayed on the demo give way to a brilliance and virtuosity within.

Breathing an absolutely oppressive energy over 36 minutes, full of intoxication, rage and trepidation, HORNS OF DOMINATION manage to put together all the indispensable ingredients for a grand Black/Death Metal album: mania & madness, tension & atmosphere, frenzy & melody.

A manifesto of excess, suckled at the breast of Mother Darkness where your shredded dreams of humanity and a better world are served on a platter of bloody skins and sharp strings!

Elevated by an outstanding earthy and highly professional production in this disdainful world of compression and plastic and refined through mastering by Brad Boatright (Audiosiege),

'Where Voices Leave No Echo' is perfected through artwork by Ernst Morsch (Discordia Graphics).

You'll die here, in solitude!
